Click [here](#) to access data on the selected projects

These 10 projects, together with the 6 Spanish projects from the SGAE Foundation already selected, will all be presented to key players from the audiovisual industry during Conecta FICTION and get a chance to receive a development contract from either Movistar + (the digital subscription platform of Spanish telco giant Telefonica) or RTVE (the Spanish public service broadcaster).

Movistar + and RTVE will each unveil the title of the project they grant a development contract on Thursday night, during the screening Premiere. A recap of the best tv series produced, aired and distributed by RTVE over the last couple of years, and the first images of the brand-new series produced by *Movistar+* will also be featured on this occasion.

Conecta FICTION is the first international event exclusively dedicated to the coproduction of fictional television series between Europe, Latin America and the Hispanic United States. The first edition will be celebrated in Santiago de Compostela between the 20th and the 23rd of June. It is organized by the Axencia Galega das Industrias Culturais (Agadic) of the Galicia's Xunta government, ICEX Exportation and Investments Spain and the SGAE Foundation, and it is produced by Inside content.
